Your personal transaction information is under constant attack. More importantly, your client's private information is vulnerable. Recent high-profile real estate cybercrimes have shown that theft or loss of this information can be disastrous. In this workshop we will examine some of the most common methods that cyber criminals use to steal private information and ways you can protect yourself. We will also discuss how title and escrow personnel are complying with the new requirements of the Consumer Financial Protection Bureau (CFPB) to safeguard private information.
